To Our Valued Customers:

California's Safe Drinking Water and Toxic Enforcement Act of 1986, as amended, and referred to as "Proposition 65", requires businesses manufacturing or distributing products to inform persons about exposures to chemicals in the products that are known to the State of California to cause cancer, birth defects, or other reproductive harm. For more information, please refer to www.p65warnings.ca.gov.

Morton Manufacturing does not produce metal alloys, but purchases solid metallic raw materials from certified mills in order to produce our products. The alloys used in the manufacture of these products stainless, nickel, cobalt and titanium grade fasteners contains metals which may be questioned as to Proposition 65 compliance. We realize that stainless, nickel and titanium products contain a number of alloyed substances, some of which are chemicals on the California list including but not limited to, cobalt, nickel, and chromium in their metallic forms. These chemicals alloyed in our products are considered stable and physiologically inert and should not be considered hazardous to humans under normal use and conditions.

If you have any questions concerning the content of the products supplied by Morton Manufacturing, please refer to the material test reports and or contact us at our main number (661-298-0895).
